

THE KEVLAR® HARNESS BY MILLER HAS BEEN DESIGNED TO OFFER EXCEPTIONAL HEAT AND FIRE RESISTANCE FOR THOSE WORKING AT HEIGHT IN HIGH-RISK ENVIRONMENTS.

THIS IS THE IDEAL SOLUTION FOR WELDING, DEFENCE, FIRE-FIGHTING, AND OFFSHORE APPLICATIONS.

The special blue, flame-retardant Nomex® webbing protects against weld splatter and sparks whilst the yellow Kevlar® inner core adds strength and high temperature resistance.

Increased safety thanks to the bright contrasting colours which facilitate inspection.

Available in 2 different versions, the Kevlar® harness offers the perfect solution for a wide range of applications when working at height.

FEATURES

- Sub-pelvic strap
- Adjustable shoulder straps (Model 650 K)
- Adjustable leg straps
- Clips on shoulder straps for lanyard when not in use

2 KEVLAR HARNESS MODELS

KEVLAR HARNESS

special
EXTREME
ENVIRONMENT

THE ATEX ANTI-STATIC HARNESS BY MILLER IS THE PERFECT SOLUTION FOR WORK AT HEIGHT IN EXPLOSIVE ATMOSPHERES. IT IS PARTICULARLY SUITABLE FOR PETROCHEMICAL AND MINING ENVIRONMENTS.

INCREASED SECURITY:

The anti-static material prevents the risks of an electrostatic discharge igniting the explosive atmosphere thus allowing the user to work in complete safety in these high-risk environments.

VERSATILE:

With two anchorage points (rear and front), the Miller anti-static harness lends itself to a wide range of applications.

EASY TO USE:

Once the harness is fitted, the dorsal extension strap facilitates connection to the intermediate attachment (lanyard, fall arrest block..)

The detachable dorsal pad facilitates harness donning and prevents the entanglement of the straps.

FEATURES

Dorsal anchorage point (with webbing extension and loop)
and sternal anchorage point (with webbing loops)

Sub-pelvic strap

Protective back pad

Adjustable shoulder straps

Adjustable leg straps with automatic buckles

For complete safety, this harness should be used in conjunction with an anti-static self-retracting lifeline (e.g. Falcon SRL) and a grounded anchorage point.

CE certified and complies with EN361 (2002) and with the European Directive ATEX 94/9/CE in accordance with EN 13464-1 and EN 13463-1(2003)
